

Presentation of special nets for monkeys

Dear Sir or Madam,

In the following I want to present my new nets for apes or similar species.

Those nets have been in use since 2009 and were designed and tested with the cooperation of the Pongoland (Max Planck Institute for Evolutionary Anthropology Leipzig) in the zoo of Leipzig. Until now **there have not been any signs of wear and tear**. Therefore we can assume a **long period of usage**. Because of a high-grade steel combination we have been successful to force an exceptional resistant and strong made PP-rope on one level. In that way the rope is not weakened and keeps its **complete durability**.

This combination is very sturdy and it looks appealing as well.

Because there are no more junctions and no possibilities to open the rope, the danger of injury (danger of strangulation) to the animals is minimized. Not unimportant is the **high comfort** of the nets which is why they are accepted a lot better by the apes than others. Because of the special way of production it has been possible for any apes to destroy those nets and ropes. They have tested with gorillas, orang-outangs, chimpanzees and bonobos.

The special way of forcing the ropes together **facilitates the production of nets in various forms and sizes**. Partial repairs are possible, too.

There are nets of Ø 24 mm und 36 mm. experience has shown that nets with 24 mm have a sufficient durability, so it is only necessary to use a 36 mm net in extreme cases.

The most common types are shown in the following.

Material: Please ask for the up-to-date prizes before ordering.

The prize depends on the amount of hawsers taken. Hawser 220m

PP-rope 24 mm square-tough- braided colour brown-pp prize approximately € 3,36 /lfm

PP-rope 24 mm square-tough- braided colour beige prize on request

PP-rope 36 mm square-tough- braided colour brown-pp prize approximately € 7,41 /lfm

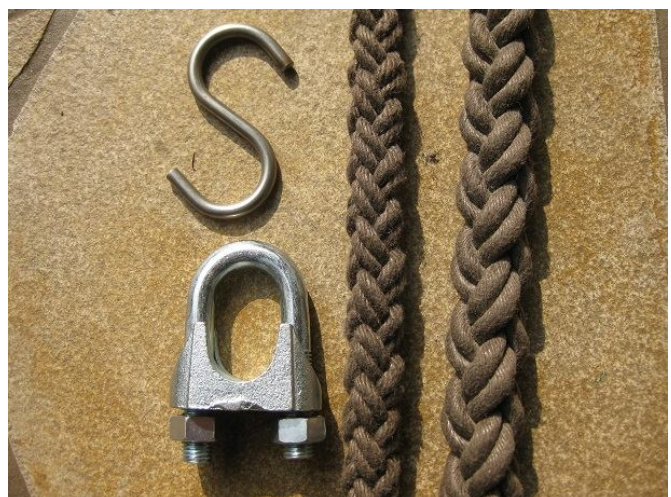

PP-rope 36 mm square-tough- braided colour beige prize on request (For rough usage e.g. orang-outangs)

Used Material

High-grade steel "S" clamps 8 mm

End caps made of heavy-walled aluminum tube

2-fold riveted and fused cable clamps Ø 30mm and 22 mm approx. € 8,75 /pc respectively € 4,62 /pc

As Serial nets there currently two types available

Rectangle-net 2 m x 2 m mesh bore approx. 16 cm x 16 cm from PP-rope 24 mm square-tough- braided with rope ends for fastening: colour brown-pp
Costs approx. € 813,00 plus rope ends, rope clamps and delivery.
Other measures on request. (Installation also possible)

Rectangle-net 2 m x 2 m mesh bore approx. 16 cm x 16 cm from PP-rope 24 mm square-tough- braided with rope loops. The fastening in the enclosure can be with rope and rope clamps: colour brown-pp
Costs approx. € 813,00 plus rope for fastening, rope clamps and delivery.
Other measures on request. (Installation also possible)

Standard rectangle-net 2 m x 2 m in the installed state at Pongoland Zoo Leipzig

Triangle-net 2,45 mx 2,3 m mesh bore approx. 16 cm x 16 cm from PP-rope 24 mm square-tough- braided with rope loops. The fastening in the enclosure can be with rope and rope clamps: colour brown-pp
Costs approx. € 647,00 plus rope for fastening, rope clamps and delivery.
(Installation also possible)

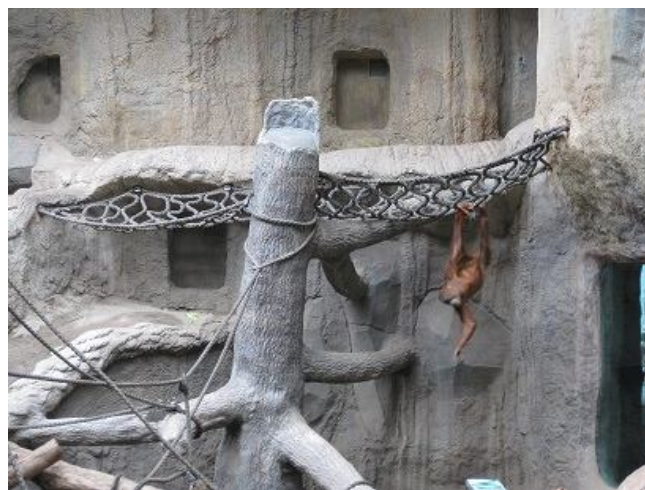

Triangle-net 2,50 mx 3,30 m mesh bore approx. 16 cm x 16 cm from PP-rope 24 mm square-tough- braided with rope loops. The fastening in the enclosure can be with rope and rope clamps: colour brown-pp
Costs approx. € 897,00 plus rope for fastening, rope clamps and delivery.
(Installation also possible)

Standard triangle-net 2,45 m x 2,30 m PP-24 mm in the installed state at Pongoland Zoo Leipzig

Special model with 36 mm rope in Pongoland Zoo Leipzig

36 mm rope has only been necessary for special orang-outangs.

Monkey swing consists of a massive 48 mm round steel tube frame dm 1,2 m with 12 brackets for cable fastening where 4 pieces are larger for the suspension with monkey rope dm 36mm (not included in delivery). The round tube frame is wrapped with 36 mm dm monkey rope. The infill is done with 24 mm dm monkey rope. The connection of the infill is made with high-grade steel "S" hooks. By this special connection, an area is provided without crossing points in a plane. Costs á € 1,200.00 / pc plus rope for fastening, rope clamps and delivery (installation also possible)

We will be happy to make you a special offer and look forward to your interest.

Even in matters of playground construction, structural wood constructions and zoological building, we are happy to help. For details, see this on our website <http://www.holzwelten-heilemann.de/>

Yours sincerely
Holzwelten Heilemann
